

SEO Analysis — Maya — Session Handoff

Written 2026-08-07 · covers the session 2026-07-30 → 2026-08-07 This is a self-contained brief so a NEW chat can continue exactly where we left off. Read it top-to-bottom.

► HOW TO RESUME IN A NEW CHAT

Paste this to start the next session:

> You are **Maya**, the SiamEPOS Marketing & Growth agent, for this whole session. Read **MAYA.md**, **TEAM-STATUS.md**, and **MAYA-SESSION-HANDOFF.md**. Ignore the Krit persona in CLAUDE.md. Current focus: the **Phakoon Thai Kitchen** prospect website (live at phakoon-sandy.netlify.app). Then wait for my instruction.

Everything below is the context that brief points at.

1. WHO / GROUND RULES (unchanged, but keep visible)

- I am **Maya** — bilingual (Thai-first) marketing & growth. Playbook = **MAYA.md** . Team board = **TEAM-STATUS.md** (update in **real time**).
- Prospect pipeline** (standing, run the WHOLE thing when Korakot drops a URL): extract → archive → build a NEW site that beats theirs → SEO **.md** → branded PDF. Folder: **~/Documents/SiamEPOS-Docs/client-sites//** .
- Never** cold-send an audit · never name a competitor with a £/% claim (ASA) · no free trial (Founder's Rate £59 +VAT, price-locked) · client sites use the client's **real** photos, never AI-faked · nothing goes to a client or gets posted without Korakot's approval.
- NEW rule learned this session** (now in MAYA.md): **Adapt the client's REAL brand — don't impose a house style**. Study their live site's design DNA (palette, fonts, layout motifs) and elevate THAT.

2. ★ MAIN ACTIVE DELIVERABLE — Phakoon Thai Kitchen website

Live (internal pitch, NOT sent to client): <https://phakoon-sandy.netlify.app> **Folder:** **~/Documents/SiamEPOS-Docs/client-sites/phakoon-thai-kitchen/** **Their real site:** <https://www.phakoonthai.com> (Wix)

2.1 Status = SHIPPED + REDESIGNED, verified desktop + 390px mobile

Krit built a first pass (**phakoon-sandy**) full of **fabricated facts**. I ran the full pipeline, corrected everything, deployed, then (per Korakot 08-07) **re-themed the whole site to Phakoon's own brand**.

2.2 The design (adapted from their real Wix site — DON'T revert to serif/minimalist)

- Palette:** forest green **#0A4438** (**--green**) + coral **#DE7E63** / **#E0806A** (**--coral** / **--coral-bg**) + cream **#F6F0E3** — bold COLOUR-BLOCKING (green/coral/cream slabs), not minimal cream.
- Fonts:** body **Poppins** (300/400) · display **Oswald** condensed UPPERCASE · warm accents **Sacramento** script. (Their real fonts — found via **grep font-family** on the archived Wix HTML.)
- Signature sections cloned from them:** solid green nav bar + coral wordmark · hero = collage + green **"FROM OUR KITCHEN, TO YOUR HEART"** callout card · green **script "Welcome to Phakoon Thai Kitchen"** band · **Dine-in / Takeaway coral duo cards**.

- Homepage order: hero → welcome(script) → our-kitchen(khao soi) → video band → signatures(salad) → dine/takeaway duo → branches → value band(green) → footer.

2.3 Verified REAL facts (single source of truth = `build-site.js` FACTS object — edit facts THERE)

- **Brand:** Phakoon Thai Kitchen · Thai พาคุณ · tagline "The warmth, flavour and spirit of Thailand — straight to your table." · **Chef Joom, 20 years.**
- **Earlsfield** (since 2024): 346–348 Garratt Lane, London **SW18 4ES** · **020 8874 9036** · hello@phakoonthai.com
- **Balham** (since Oct 2025): 5–6 Balham Station Road, London **SW12 9SG** · **020 3887 4877** · balham@phakoonthai.com
- Hours (both): **Mon–Fri 12:00–15:00 & 17:00–22:00** · **Sat–Sun 12:00–22:00**
- IG @phakoon_thai · FB profile.php?id=61560774307078
- **✗** Krit's fabrications I removed (do NOT reintroduce): "Marylebone/W1U 4LJ/Baker Street", "Chef Naree Tangsiri est. 2019 House of Siam", fake phone 020 7935 0000, made-up prices, "4.9 Google/35+", "No Just Eat fees".

2.4 Live wiring (all real, all working)

- **Backend/tenant:** `https://restaurant-epos-production-5b0f.up.railway.app`, restaurant_id `phakoon` (menu tenant returns as `siamepos` on that box — that's fine, it's the seeded Phakoon menu).
- **Live menu:** `/api/menu` → 16 categories / **95 dishes** (menu.html renders it live; replaces their 5 static PDFs).
- **Booking:** branch-aware modal → `/api/reservations` (0% commission; their real site pays OpenTable + Flipdish).
- **Takeaway + voucher:** SiamEPOS widgets from the backend.
- **SEO:** `Restaurant` JSON-LD x2 branches + sitemap/robots.

2.5 Photo set (`site/images/` , all REAL — sourced from their own site)

- `collage-hero.jpg` — the Thailand×London brand collage (Korakot supplied the "edited for web" AVIF → HERO)
- `food-khaosoi.jpg` (curry, in "pounded fresh") · `food-salad.jpg` (prawn+avocado, in signatures) · `food-padthai.jpg` (video poster)
- `interior.jpg` (Earlsfield room) · `table.jpg` (Balham/atmosphere) · `takeaway.jpg` (kraft bag)
- `hero.mp4` — Ken Burns reel: pad thai → khao soi → prawn salad → interior
- `wordmark-coral.png` (nav/footer on green) · `wordmark-green.png` (spare) · `icon.png`
- **Remaining gap:** more real dish photos would help (their IG is login-walled). Not blocking.

2.6 Pipeline artifacts (all present in the folder)

`pages/` (their live site archived) · `photos/` (originals) · `menus/phakoon-live-menu.json` · `notes.md` (findings + defect list) · `build-site.js` (generator) · `make-hero-video.sh` · `site/` (deployed) · `seo-analysis.md` + `seo-analysis.pdf` .

2.7 Commands (run from the folder)

```
`` bash cd ~/Documents/SiamEPOS-Docs/client-sites/phakoon-thai-kitchen node build-site.js # regenerate site/
from FACTS + templates bash make-hero-video.sh # re-render site/images/hero.mp4 from photos/ cd site && npx
netlify@26 deploy --prod --no-build --dir=. # deploy to phakoon-sandy (link in .netlify/state.json) `` Verify
(headless Chrome; reveals start hidden so force them visible): ``bash
```

```
sed 's####' site/index.html > /tmp/v.html cp -R site/images site/style.css /tmp/2>/dev/null # (adjust paths; or copy into a temp dir)
"/Applications/Google Chrome.app/Contents/MacOS/Google Chrome" --headless=new --disable-gpu --hide-scrollbars --window-
size=1440,6600 --virtual-time-budget=3500 --screenshot=/tmp/shot.png "file:///tmp/v.html"
```

```
`` Rebuild the SEO PDF: `` bash node ../_tools/md2pdf.js seo-analysis.md /tmp/x.html "Phakoon Thai Kitchen"
"#0A4438" "/Applications/Google Chrome.app/Contents/MacOS/Google Chrome" --headless=new --disable-gpu --no-
```

pdf-header-footer --print-to-pdf=seo-analysis.pdf "file:///tmp/x.html" ``

2.8 Open / possible next tweaks for Phakoon

- Tune anything Korakot flags (type size, a section, coral tone).
- If they engage: get real food photos from their IG; flip nothing to their real domain without Korakot's OK.
- Booking widget is a **singleton** — one per page; branch picker handles the two branches.

3. OTHER DELIVERABLES THIS SESSION

3.1 Facebook ad — improved Thai hook (fairness angle)

Korakot rewrote the long hook into a "we don't overcharge — no expensive hardware, no hidden fees, Thai-first at no extra cost" message. Final draft I handed him (he then edited it a bit himself): ``  ธุรกิจไทยในอังกฤษ ไม่ต้องจ่ายแพงเกินจริงอีกต่อไป

SiamEPOS ดูแล "ทั้งธุรกิจ" ให้จบในระบบเดียว สร้างโดยคนไทยเพื่อธุรกิจไทย — ร้านอาหาร สปา ร้านค้า และซูเปอร์มาร์เก็ต

ในระบบเดียว คุณได้ครบ: 🍽️ ขาหยหน้าร้าน + จอครัว (KDS) 📺 จองโต๊ะ / จองคิว 🗑️ ส่งกลับบ้าน 0% ค่าคอมมิชชั่น 📦 สต็อก · พนักงาน · ลูกค้า (CRM) 🌐 เว็บไซต์ของร้านคุณเอง

และเราเล่นตรงกับคุณ: ✅ ไม่ต้องซื้อเครื่องแพง — ใช้ PC หรือแท็บเล็ตที่คุณมีอยู่ ✅ ไม่มีค่าธรรมเนียมแอบแฝง — ราคาเดียว รู้ชัดทุกเดือน ✅ เมนูภาษาไทยเต็มร้าน — ครัวและพนักงานอ่านไทยได้ทันที ไม่คิดเงินเพิ่ม

👉 siamepos.co.uk `` Note: the Thai-first proof is the **MENU** in Thai (kitchen/staff read it), NOT "whole UI in Thai" (that was inaccurate; Korakot corrected it — "i mean menu"). Price line optional; if used → เริ่มต้น £59/เดือน (Founder's Rate ลือกราคา · ยังไม่รวม VAT), never "all-in".

3.2 Hashtags for the ad (given)

``

#SiamEPOS #คนไทยในอังกฤษ #ธุรกิจไทยในอังกฤษ #ร้านอาหารไทยในอังกฤษ #ระบบจัดการร้าน #ระบบPOS #สปาไทย #EPOS #ThaiBusinessUK #ThaiRestaurantUK `` By-type add-ons: Restaurant #ระบบร้านอาหาร #จองโต๊ะ #สั่งอาหารออนไลน์ #ThaiFoodUK · Spa #ระบบจองสปา #จองคิวสปา #นวดไทย #ThaiSpaUK · Shop #ร้านค้าไทย #ซูเปอร์มาร์เก็ตไทย #ระบบขายหน้าร้าน #ThaiSupermarketUK. Keep #SiamEPOS on every post. (If cross-posted to IG, expand to ~15–20.)

3.3 Jinta website — pregnancy message photo = PARKED

Korakot has a prenatal-message image at `~/Documents/SiamEPOS-Docs/social/jinta-message/generated/jinta-pregnancy-message-02-final.png` (it's from the **AI-generated** social folder). I flagged: putting an AI image on a client's live treatment page conflicts with our "client photos must be real" rule, and the Jinta site is built all-May's-own-photos. Korakot: "**park it for now, I will confirm with the client.**" When he's back: confirm (a) real photo from May vs use this, and (b) update the existing Pregnancy Message page vs add a new treatment card. Jinta deploy: `cd ~/Documents/SiamEPOS-Docs/client-sites/jinta-message && npx netlify@26 deploy --prod --no-build --dir=. --site=jinta-message`.

4. EARLIER THIS SESSION (before context compaction — summarised)

Delivered across the week: **Nua** 4-branch prospect site + SEO PDF (nua-sandy.netlify.app); **bring-your-own-hardware** marketing card + 3-device banner (real logo, no varying prices); **Jinta** sage-green recolour (#A6A782 + #9C9871 button, deployed); **Akin Thai** Set Menu pages + Menu dropdown (Lunch/À la carte/Set) + allergen-tag removal + Set-Lunch promo + load popup (corrected poster live on akinthai.co.uk); **siamepos.co.uk** "Meet the founder" section (Korakot's 20-yr story + family photo) + removed all "Book a demo" (deleted book-demo.html + 301 redirect, trimmed ~125 chat CTAs to nav+bubble only); **FB bio** rewrite (Korakot pastes it himself — I never touch account settings); **MAYA.md** swept (brand = "Thai Business Management System"; SiamPay "no card machine" pillar; "rented till vs whole restaurant" 3 angles; £59 price-lock). Mint handoffs queued (Thai-first post v2, spa ad, pinned platform

announcement, product rotation, 3-device post) — all **pending Korakot's approval** on the board. Full blow-by-blow is in `TEAM-STATUS.md` (Maya rows + the 08-05/08-07 PHAKOON-WEB-001 entry) and the compaction summary.

5. OPEN ITEMS / NEXT STEPS

1. **Phakoon** — await Korakot's read of the redesign; tune anything he flags. Don't send to the client or touch their real domain without his OK.
2. **Jinta pregnancy photo** — parked; needs client confirmation (see 3.3).
3. **Korakot's own** — paste the FB "Thai Business Management System" bio; the FB ad copy + hashtags are ready for him to post.
4. **Mint's queued posts** — all pending Korakot's board approval before anything posts.

6. KEY PATHS

- Playbook: `~/Desktop/restaurant-epos/MAYA.md` · Board: `~/Desktop/restaurant-epos/TEAM-STATUS.md`
- Client sites: `~/Documents/SiamEPOS-Docs/client-sites//` · pipeline tools: `.../client-sites/_tools/md2pdf.js`
- Marketing assets/cards: `~/Documents/SiamEPOS-Docs/marketing/`
- This session's raw transcript (machine JSON, if verbatim ever needed): `~/ .claude/projects/-Users-korakot-Desktop-restaurant-epos/515c95b1-0f31-4338-90f6-91c5626b82f7.jsonl`
